

## Vitamin A

1

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Vitamin A or Retinol works as an antioxidant for the skin. This vitamin disarms free radicals that cause tissue and cell damage. Wrinkles and lines are gradually smoothed, while also boosting collagen, resulting in a more youthful overall appearance, diminish stretch marks, assists skin's natural healing processes. This vitamin and its derivatives have displayed beneficial effects in controlling acne and in reversing skin damage caused by environmental factors.

**Administration**  
Transdermal with virtual mesotherapy (electroporation, iontophoresis) or with superficial subcutaneous microinjections or with Derma Roller.

**Presentation**  
Vial 10 x 10 ml

## Lightening Cocktail

2

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

**Active Ingredients:** Glutathione, Glycolic Acid, Kojic Acid, Vitamin C, and Citric Acid

Glutathione is a detoxifying agent and inhibits the synthesis of melanin, an action that works in synergy with kojic acid. Glycolic acid is used for its exfoliating effect in order to increase the penetration of the other topical agents, at the same time as depositing hydrating agents inside the surface of the newly exfoliated skin, thereby reducing the appearance of fine lines, wrinkles and age spots, and improving sun-damaged skin.

**Administration**  
Transdermal with virtual mesotherapy (electroporation, iontophoresis) or with superficial subcutaneous microinjections or with Derma Roller  
**Presentation**  
Vial 10 x 10 ml

## L-Carnitine

3

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

L-Carnitine is an important amino acid. This compound acts a significant role in increasing lipid metabolism. It does this by improving mitochondrial function and increasing cellular energy. L-Carnitine accelerates fat burning.

**Administration**  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

**Presentation**  
Vial 10 x 10 ml

## Hyaluronic acid 3.5%

4

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Hyaluronic acid fills the space between different parts of skin tissue. The essential function of hyaluronic acid is to help transportation of nutritive molecules from the bloodstream to different skin cells, hydrate skin tissue by attracting water and to contribute to dermis renewal and elimination of harmful compounds from the skin. Hyaluronic acid ability to attract and bind water molecules serves to moisturize the skin and maintain the elasticity of dermal and epidermal tissues. This compound is a free radical scavenger agent that can protect the skin tissue against ultraviolet irradiation.

**Administration**  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

**Presentation**  
Vial 10 x 10 ml

## Lipolytic cocktail

5

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

**Active Ingredients:** Glutathione, Glycolic Acid, Kojic Acid, Vitamin C, and Citric Acid

Glutathione is a detoxifying agent and inhibits the synthesis of melanin, an action that works in synergy with kojic acid. Glycolic acid is used for its exfoliating effect in order to increase the penetration of the other topical agents, at the same time as depositing hydrating agents inside the surface of the newly exfoliated skin, thereby reducing the appearance of fine lines, wrinkles and age spots, and improving sun-damaged skin.

**Administration**  
Transdermal with virtual mesotherapy (electroporation, iontophoresis) or with superficial subcutaneous microinjections or with Derma Roller  
**Presentation**  
Vial 10 x 10 ml

## Finasteride

6

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Finasteride is used to treat male pattern baldness (androgenic alopecia). It should be used by adult men only. This medication works by decreasing the amount of a natural body hormone (DHT). Decreasing the amount of DHT leads to increased hair regrowth and slower hair loss.

**Administration**  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.  
**Presentation**  
Vial 10 x 10 ml

## Vitamin C

7

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Vitamin C, a revitalizing antioxidant solution that neutralizes free radicals (the unstable molecules that age the skin as a result of pollution, smoking and exposure to the sun). It inhibits melanin, stimulates growth of the hydro-lipid film and enhances collagen synthesis, an important skin protein that strengthens the structural support and elasticity of the skin.

**Administration**  
Transdermal with virtual mesotherapy (electroporation, iontophoresis) or with superficial subcutaneous microinjections or with Derma Roller.

**Presentation**  
Vial 10 x 10 ml

## Caffeine 10%

8

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Caffeine increases blood flow and stimulates adipocytes to release fat into the bloodstream, so that it can be burned by the body's metabolism. In simple terms, Caffeine solution drains the body's fat cells. In parallel, it is a reducing solution tightens and tones the skin, helping to reduce the appearance of cellulite. When applied topically, it works to act as a lipolytic agent, breaking down the fat tissue and causing localized weight loss, without incurring any side effects.

**Administration**  
Transdermal with virtual mesotherapy (electroporation, iontophoresis) or with superficial subcutaneous micro injections or with Derma Roller

**Presentation**  
Vial 10 x 10 ml

## Hair Plus Cocktail

9

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

**Ingredients:** Biotin, Panthenol, Troxerutine, Glutathione, Taurine, Pyridoxine, Thiamine, Minerals, Amino acids.

Hair Plus formula combines different types of ingredients that act at different levels and phases of the hair growth cycle. The active ingredients induce a vasodilatation that seeks an adequate perfusion of the cells of the hair bulb optimizing the delivery of the hair bulb optimizing the delivery of group vitamins protects the structures attached to the hair follicle that reinforce all the capillary structure

**Administration**  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

**Presentation**  
Vial 10 x 10 ml

## Sodium Deoxycholate

10

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Sodium Deoxycholate is applied topically. It works to act as a lipolytic agent, breaking down the fat tissue and causing localized weight loss. It can also be used to get rid of liposuction treatments.

**Administration**  
Transdermal with virtual mesotherapy (electroporation, iontophoresis) or with superficial subcutaneous microinjections or with Derma Roller.

**Presentation**  
Vial 10 x 10 ml

## Dutasteride

11

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

This active ingredient improves quality of the hair, the scalp restoring hydration and reduces hair loss by anchoring hair follicle. This compound protects the structures attached to the hair follicle that reinforce all the capillary structure. Dutasteride accelerates hair growth and reduces hair loss.

**Administration**  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

**Presentation**  
Vial 10 x 10 ml

## Mesolift Cocktail

12

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

**Active ingredients:** Hyaluronic Acid, DMAE, Organic Silicon, Sodium DNA vitamins A, B, C and E, Amino acid  
This cocktail provides a lifting and tightening effect, hydrates skin and improves the appearance of mild and moderate wrinkles in skin. Mesolift cocktail returns strength, flexibility and elasticity to collagen and elastin in connective tissues.

**Administration**  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

**Presentation**  
Vial 10 x 10 ml

## Dark Circle cocktail

13

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

**Active ingredients:** Hyaluronic acid, Ginkgo Biloba Extract, Organo Silica, Artichoke Extract, Vitamin C, Troxerutin, Palmitoyl Tripeptide, Palmitoyl Tetrapeptide, Amino acids.  
This under-eye cocktail contains hyaluronic acid and some active ingredients including vitamins, amino acids, antioxidants, and more. This cocktail improves microcirculation, skin elasticity and decreases puffiness, wrinkles, and dark circles.

**Administration**  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

**Presentation**  
Vial 10 x 10 ml

## Glutathione

14

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Glutathione is a low molecular weight thiol-tripeptide that plays a prominent role in maintaining intracellular redox balance. It is known that glutathione promotes pheomelanin synthesis, inhibit intracellular melanogenic enzymes, and demonstrates anti-oxidative, anti-aging and lightening effects in skin.

**Administration**  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

**Presentation**  
Vial 10 x 10 ml

**Organo Silica****15****DMAE****16****Poly Vitamins****17****Phosphatidylcholine****18****Anti-aging cocktail****19****Dexpanthenol****20**

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

The Organo Silica Regenerative Solution is indicated to restore the skin tissue and slow down the aging process of skin. The Organo Silica returns strength, flexibility and elasticity to collagen and elastin in connective tissues. It keeps the skin hydrated, firms and reinforces the skin tissue.

Administration  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

Presentation  
Vial 10 x 10 ml

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

DMAE or dimethylaminoethanol has a potential anti-inflammatory effect and a documented increase in skin firmness with possible improvement in underlying facial muscle tone. DMAE relaxes fine lines and wrinkles and assists in firming sagging and aging skin, resulting in an overall more tightened, toned and youthful appearance of skin.

Administration  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

Presentation  
Vial 10 x 10 ml

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

active ingredients: Vita. Vit C, Vit B complex (B1, B2, B3, B5, B6), Vit E, Vit D. Poly Vitamins nutritive Solution is a highly antioxidant cocktail indicated for maintaining skin health. It is essential to stimulate the cells through a regular supply of energizing elements.

Administration  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

Presentation  
Vial 10 x 10 ml

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Phosphatidylcholine or lecithin increases the function of enzymes that degrade the lipids of the cell membrane of adipose tissue. Lecithin has a lipotropic mobilisation action that increases the fluidity or permeability of the adipose membrane, which promotes the outflow of lipid components. This is related to the saturation of fatty.

Administration  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

Presentation  
Vial 10 x 10 ml

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Ingredients: Hyaluronic Acid, DMAE, Oligopeptides, Amino Acids, Minerals, Nucleic Acids, Reducing Agents, Copper Tripeptide, Vitamins

Anti-aging cocktail is rich in revitalizing ingredients used for rejuvenation. It contains hyaluronic acid, an essential element for viscoelastic skin balance. It also has vitamins that have an antioxidant effect, are free radicals neutralizers, biological balancers and collagen synthesis boosters. Amino acids are essential elements of the protein synthesized by fibroblasts. Minerals are present in hundreds of enzymatic reactions and essential cellular functions. Finally, co-enzymes increase the speed of skin tissues construction.

Administration  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.  
Presentation  
Vial 10 x 10 ml

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Dexpanthenol also known as D-panthenol and vitamin B5. Hair growth stimulating activity of D-panthenol is exerted by increasing the cell viability, suppressing the apoptotic markers, and elongating the anagen phase in hair follicles. Pantethine is the bioactive form and acts as an energy source for the hair follicle. It strengthens the hair follicle, enhances the saturation of hair with oxygen, promotes tissue regeneration, and has an anti-inflammatory effect.

Administration  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

Presentation  
Vial 10 x 10 ml

MADE IN U.K

**Biotin****21****Minoxipedia Cocktail****22****Mesopecia Cocktail****23****Andopecia Cocktail****24**

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Vitamin H or B7 turns into coenzyme biotin, plays the role of a coenzyme in carboxylation reactions and in the biosynthesis of fatty acids. Biotin accelerates hair growth, prevents hair loss, baldness. This compound protects the structures attached to the hair follicle. Due to the sulfur content, it has a fungicidal effect, normalizes fat metabolism in the sebaceous glands, and reduces the production of sebum.

Administration  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

Presentation  
Vial 10 x 10 ml

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Ingredients: Minoxidil, Taurine, Biotin, Panthenol, Troxerutine, Glutathione, Pyridoxine, Thiamine  
Minoxipedia formula combines different types of ingredients that act at different levels and phases of the hair growth cycle. Minoxidil and other gradients induce a vasodilatation that seeks an adequate perfusion of the cells of the hair bulb optimizing the delivery of nutrients and prevent hair loss and dandruff. This formula protects the structures attached to the hair follicle that reinforce all the capillary structure.

Administration  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

Presentation  
Vial 10 x 10 ml

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Ingredients: Panthenic acid, Biotin, Glutathione, Taurine, Pyridoxine, Thiamine, Some Amino Acids, Troxerutine  
The compounds that are used in Mesopecia are all natural hair growth agents that recommend to counteract the problem of hair loss in men. The active ingredients induce a vasodilatation that seeks an adequate perfusion of the cells of the hair bulb optimizing the delivery of nutrients and prevent hair loss and dandruff. The content of high concentrations of B group vitamins protects the structures attached to the hair follicle that reinforce all the capillary structure.

Administration  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.

Presentation  
Vial 10 x 10 ml

This product can be used by qualified and experienced medically trained professionals only in mesotherapy.

Ingredients: Some Amino Acids, Thiamine, Taurine, Biotin, Panthenol, Glutathione, Pyridoxine  
Andopecia promotes scalp hair growth and prevents further hair loss in a significant proportion of women. The content of high concentrations of some amino acids protect the structures attached to the hair follicle that reinforce all the capillary structure. Andopecia formula combines different types of ingredients that act at different levels and phases of the hair growth cycle. The active ingredients induce a vasodilatation that seeks an adequate perfusion of the cells of the hair bulb optimizing the delivery of nutrients and prevent hair loss and dandruff.  
Administration  
Thermotherapy, iontophoresis, electroporation, derma roller, vacuotherapy, etc.
